[^0]:    Notes
    The specified protection classification (IP code) applies only when the cover is closed and the appropriate cable is used, in accordance with the clamping range of the above mentioned cable gland.

    Mounting:
    When used as safety switch pay attention to EN 60204 (use NC-contacts).
    Also secure by a set pin (hole within the bottom of the case).
    Actuator to be fixed with 4 screws M4 at the movable guard.
    Please pay attention to the specified maximum of misalignment of the actuator.
    Position of the actuator head determined at works, must not be modified.
    Screws obviously secured.
